

### Construction Site Security

With a growing reputation for highly professional service excellence, GSS are at the forefront of a totally new and unrivalled concept in security systems design and risk management

The GSS Construction site solution is a static, temporary and re-deployable remotely monitored CCTV system.

A security concept developed for the construction industry as a solution to the diverse range of threats and management challenges faced by todays construction companies.

Designed to monitor, digitally record and where required, action a response, the GSS construction site system has shown to offer real cost saving benefits, 24/7 security and a high degree of flexibility and reliability over manned guarding solutions.

- Perimeter Alarm Detection.
- CCTV Alarm Verification
- Voice annunciation, audio systems inform intruders of their detection.
- Integrated access and barrier control for additional site management solutions.
- Health & Safety monitoring and management.
- Re-deployment capabilities.
- Cost saving benefits.
